Analysis Directory =============

Included Files:
- Detailed_CIs.pdf : includes a table of all CIs reported in the paper
- user_answers_ms.csv : experiment results
- A set of R scripts to be ran in order for each measure: 1-*.R aggregates (common), 2-*.R reports means and CIs for all tasks, 3-*.R is the per task analysis. Bonferroni corrections were not applied in our analysis.

All analysis was planned before the experiment ran.

———

The directory plots/ includes all the generated plots and CIs generated using Bootstrapping (10.000). They are also reported in Detailed-CI.pdf collectively. When scripts run they overwrite the existing plots and CI reports in directory plots/

Task Names:

B - Single Time x Region
C - Single Time x All Locations D - Time Interval x Location
E - Time Interval x Region
F - Time Interval x All Locations G - All Time x Location
H - All Time x Region
I - All Time x All Locations

Note: in the CONF reporting the name Symbol refers to the technique Glyph in the paper
